

A new product from Robert A Schless & Co Inc and Bellamys

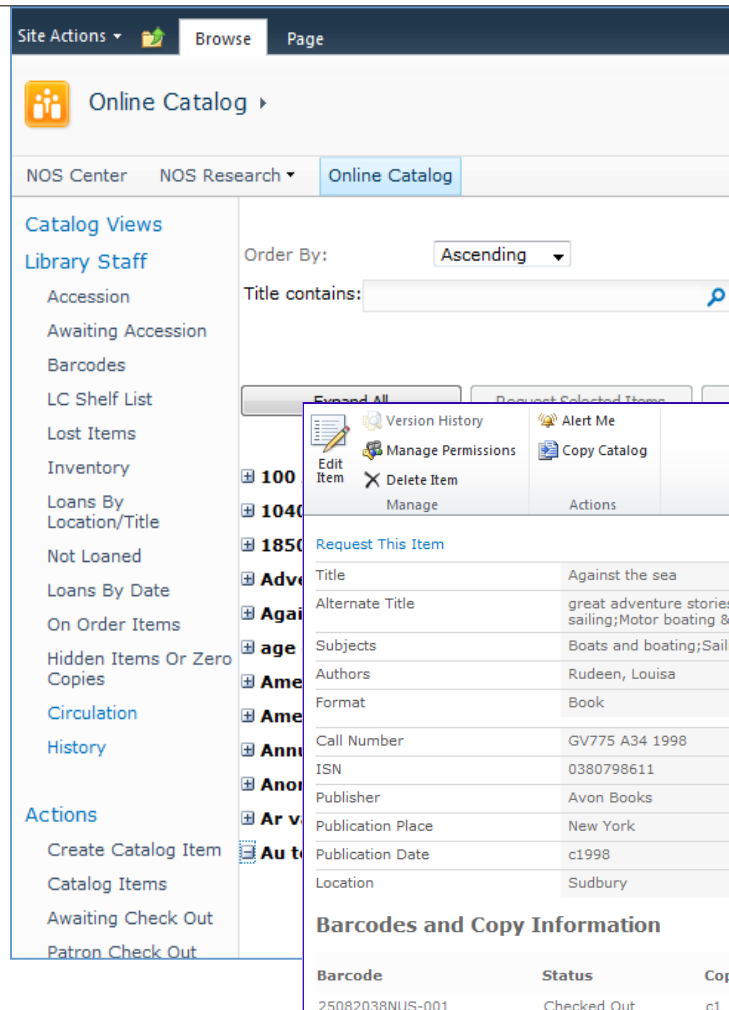

Library software for companies using Microsoft™ SharePoint 2010™

Robert A. Schless & Co. Inc. and Bellamys are pleased to announce the availability of a new “next generation” integrated library system that runs natively on SharePoint 2010. NOTEbookS on SharePoint (NOS) uses powerful features and workflows to manage the input, administration and delivery of corporate collections of books, internal documents, periodicals and research in the SharePoint 2010 environment. NOS integrates seamlessly with your SharePoint environment to minimize learning curve for patrons, administrators, and library staff. Using Microsoft FAST technology? Integrate NOS attached documents into FAST searching for content rich delivery of information.

NOTEbooks on SharePoint™

Features of NOTEbookS on SharePoint

- ◆ Consolidation of corporate knowledge and collections so patrons and staff can easily find the information they need
- ◆ State of the art catalog and circulation management
- ◆ Integrated barcode check-in and out
- ◆ Advanced workflows for research requests
- ◆ Record level security
- ◆ Full text searches of bibliographic as well as attached files
- ◆ Sized to fit solo libraries to large corporate consortiums
- ◆ Flexible views, alerts, messages
- ◆ Easy to administer
- ◆ Fits seamlessly into your SharePoint environment
- ◆ Simplified system administration for IT and library administrators

What is NOTEbookS on SharePoint?

NOTEbookS on SharePoint™ (N.O.S.) is an integrated library system running on the Microsoft SharePoint 2010™ platform.

Features of N.O.S. include:

Online Catalog

[Simplifies browsing and searching of all your knowledge resources for patrons](#)

- ◆ Union catalog automatically combines collections from multiple library locations into a single logical view
- ◆ Simplified access for patrons (browse and search)
- ◆ Full text search catalog (including attached Word, PowerPoint™, and Adobe Acrobat™ files.)
- ◆ One step scan and OCR tables of contents, abstracts, diagrams and photos
- ◆ Built in "hot links" to web from catalog records
- ◆ Ability to create individual project bibliographies and reference lists
- ◆ Automatic spine and bar code label generation
- ◆ Support for barcode and "lights-out" check-in and check-out
- ◆ Serials check-in support

Circulation Control

[Patrons can reserve material from their desktops](#)

- ◆ Patrons request material from any library; system routes request to associated library
- ◆ Check-in and check-out, send overdue and recall notices from native SharePoint
- ◆ Full support for barcode label printing, check-in and check-out
- ◆ Online views of reserved and on-loan materials
- ◆ Tracks overdue materials and automatically generates overdue and recall notices through e-mail
- ◆ Multitude of reports including borrower history, outstanding loans, budgeting and patron management
- ◆ Automated transfers between patrons
- ◆ Permanent loan tracking

Research Administration and Knowledgebase

- ◆ Patrons enter research request from any web accessible device or directly to the research center by phone or email
- ◆ Robust workflow routes request to appropriate research manager(s) or teams.
- ◆ Allows integration of research sources (Internet, local documents, etc.) into central knowledge repository

MARC Import

[Let the web do your cataloging!](#)

Perform Z39.50 searches of over 500 public domain libraries including Library of Congress and British Library then import records directly into N.O.S. catalog. Provides simplified import capabilities for tab delimited and Excel data, too!

Use NOTEbookS on SharePoint to simplify and speed library automation while making your collection accessible to patrons from their SharePoint portal!
